

Configuring your email client

If you have an email account hosted with ETEX, the following settings may be required to setup your account in either your smartphone or tablet, in Outlook, Apple Mail, or other email clients.

POP3 SETTINGS:

Incoming Mail Server:	mail.etex.net
Incoming Port:	995
Security Type:	SSL
Username:	First part of email address. (Ex: johnsmith@etex.net, username = johnsmith)
Outgoing Server:	mail.etex.net
Outgoing Port:	587
Security Type:	Auto, or if available in email client, TLS or STARTTLS
Authentication Required:	Yes

IMAP SETTINGS:

Incoming Mail Server:	mail.etex.net
Incoming Port:	993
Security Type:	SSL
Username:	First part of email address. (Ex: johnsmith@etex.net, username = johnsmith)
Outgoing Server:	mail.etex.net
Outgoing Port:	587
Security Type:	Auto, or if available in email client, TLS or STARTTLS
Authentication Required:	Yes

**These are the basic settings for use with the Etex email server. The settings for your device or program may vary.*
